Self-driven full stack developer and
data scientist

Since completing my Masters in
Public Administration, I have been
focused on establishing the skills
needed to be a great developer and
have become a people first
technologist.

Work

Tech Talent South, Hartford, CT

Graduate Accelerator Program (GAP), June 2019 – Present

Program for leaders to develop technical skills in an immersive learning
environment. Relevant courses include:

- Java: In depth review of language principles and application
- Full Stack: Creating responsive MVC modeled web applications
- Data Science: Utilizing cutting edge technology to solve problems

Connecticut Department of Children and Families, Hartford, CT

Child Protective Service Coordination Intern, Aug 2018 – May 2019

Supported in monitoring contracts that serve over 850 of Connecticut's
most vulnerable families annually

- Created a framework to evaluate service delivery and presented findings on the research based strategies
- Facilitated partnerships between the six agency regions and ten service providers to improve service delivery
- Partnered with regional Clinical Directors to create a model for measuring the effectiveness of over 700 clinical consultations in identifying and addressing family needs

Foodshare, Bloomfield, CT

Summer Food Insecurity Coordinator, Summer 2018, Summer 2017

Promoted Summer Meals, a USDA program that reduces summer food
insecurity for children

- Supervised two interns in outreach to over 100 major community centers across Hartford and Tolland counties
- Managed purchase and circulation of promotion materials to community networks to increase local awareness
- Created an intensive daily social media and radio ad campaign, adding over 550 followers across Foodshare's networks

Coalition for New Britain's Youth, New Britain, CT

Community and Research Intern, Aug 2017 – May 2018

Supported the Coalition in implementing projects to improve the health,
education, and life of New Britain youth

- Supported four committees with administrative support and communications across the Coalition's 400+ members
- Completed research for major Coalition projects including national grants and the YWCA's Stand Against Racism
- Partnered with community organizations to promote a children's brain development tool, Vroom in three different languages
